7 years of MAXI : monitoring X-ray transients

Tuesday 6 December 2016

Session 10 : Science from Hitomi (16:30 - 18:00)

time	[id] title	presenter
16:30	[32] Science from Hitomi: Introduction	Prof. OHASHI, Takaya
16:35	[33] Hitomi observation of the Perseus cluster - gas motions and resonant scattering -	Dr SATO, Kosuke
16:59	[34] Hitomi observation of the Perseus cluster - temperature and elemental abundances -	Dr NAKASHIMA, Shinya
17:23	[35] Hitomi results of NGC 1275: the origin of Fe-K alpha Line	Dr NODA, Hirofumi
17:41	[36] Hitomi observation of the supernova remnant N132D in the Large Magellanic Cloud	Dr KATSUDA, Satoru
