PHENIX Spinfest 2011

Friday 1 July 2011 - Sunday 31 July 2011

RIKEN WAKO JAPAN

Scientific Programme

The spinfest is dedicated to the analysis of recent PHENIX spin data, especially of the run11 W analysis. We will have regular, informal discussions about analysis related topics as well as lectures related to spin physics. In addition the regular PHENIX Spin PWG meetings will also take place for the more evolved types of analysis results.

Spin Fest Lectures

The Spin Fest lectures traditionally contain an introductory lecture about QCD as well as more specific lectures related to the longitudinal spin and transverse spin phenomena.

SpinFest Discussions

A set of information discussions about topics specific to an analysis or about common aspects related to spin analysis.
