

## **Session Program**

**Dec 5 - 7, 2016**

# **7 years of MAXI : monitoring X-ray transients**

## **Session 2 : Stellar Mass Black Hole**

RIKEN, Suzuki Umetaro Hall  
2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

# Mon, December 5

1:30 PM

## Session 2 : Stellar Mass Black Hole

**Session** | **Location:** RIKEN, 2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

1:30 – 2:00 PM

### **Progress Galactic black hole binaries over the past 7 years: a selection of recent results**

**Speaker**

Dr Jerome Rodriguez

**Location**

RIKEN, 2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

2:00 – 2:15 PM

### **Violent optical variations and correlation with X-ray variability in the 2015 outbursts in V404 Cygni**

**Speaker**

Ms Mariko Kimura

**Location**

RIKEN, 2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

2:15 – 2:30 PM

### **Two optical emission components with different variability in V404 Cygni**

**Speaker**

Mr Yutaro Tachibana

**Location**

RIKEN, 2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

2:30 – 2:45 PM

### **Observation of the long-term variability of Cygnus X-1 with MAXI**

**Speaker**

Ms Juri Sugimoto

**Location**

RIKEN, 2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

2:45 – 3:00 PM

### **Accretion flow properties of three MAXI Black Hole candidates: analysis with TCAF solution**

**Speaker**

Dr Dipak Debnath

**Location**

RIKEN, 2-1 Hirosawa, Wako, Saitama, 351-0198, Japan

3:00 PM
