

Status of First Spirit Campaign analyses

Monday, 3 September 2018 14:25 (20 minutes)

The first Spirit campaign successfully measured pion production and collective flow nucleonic flow in $108 \text{ Sn} + 112 \text{ Sn}$, $112 \text{ Sn} + 124 \text{ Sn}$, $124 \text{ Sn} + 112 \text{ Sn}$, and $132 \text{ Sn} + 124 \text{ Sn}$ collisions at $E/A=270 \text{ MeV}$. This talk will discuss the present status of the analyses of this campaign with an outlook towards publication.
