Status of RHICf-STAR combined analysis

- Because there is no RHICf data structure in STAR library, we can not get RHICf information from current μDST.
- Jerome and Ogawa-san (strongly) recommended that we have to add not only ADC level info but also particle's reconstruction info to μDST.
- With the help of Ogawa-san, basic structure to get the RHICf data from μDST was made.
- RHICf μDST mass production will be after adding all detailed RHICf reconstruction function and classes?
