

The 11th Circum-Pan-Pacific Symposium on High Energy Spin Physics

Tuesday 27 August 2019 - Friday 30 August 2019

ANA Holiday Inn Resort Miyazaki

Book of Abstracts

Contents

Opening Address	1
Experimental results and future plans at STAR	1
Experimental studies of proton spin at PHENIX	1
Recent theory developments in QCD spin	1
Longitudinal double-spin asymmetries in SIDIS studied at HERMES	1
The COMPASS program with the muon beam: past, present and future	1
Proton spin from quark and gluon	1
Strange quark suppression from a simultaneous MC analysis of parton distribution and fragmentation functions (file only)	1
”Non-pole” approach to the Sivers effect in the collinear twist-3 formalism	2
Revealing the nucleon’s spin structure using inclusive electron scattering at Jefferson Lab	2
Proton structure measurements at LHC	2
Spin-related effect in hadron production at BESIII	2
Two-photon physics at Belle	2
Fragmentation function related measurements at Belle	2
Baryon timelike form factors	2
Mechanisms for transverse single-spin asymmetries	3
Latest results in the extraction of the Sivers and transversity distributions	3
Accessing GPDs with the exclusive pion-induced Drell-Yan process at J-PARC	3
Pion-induced Drell-Yan experiments with transversely polarized proton target in COMPASS at CERN	3
Measurement of polarized Drell-Yan process at FNAL E1039/SpinQuest	3
Hadron physics and exclusive Drell-Yan process at J-PARC	3
Proton radius	3

Measurement of the neutron electric-to-magnetic form factor ratio at high momentum transfer	4
Nucleon virtual Compton amplitude in lattice QCD	4
Gluon transversity distribution in proton-deuteron collisions	4
Studies of the nucleon 3-D structure with CLAS12 at Jefferson Lab	4
Very forward particle productions at LHCf and RHICf	4
First result of transverse single spin asymmetry for very forward pi0 production in polarized p+p collisions at $\sqrt{s} = 510$ GeV	4
Gravitational form factors for finding mass and pressure distributions in hadrons	4
The energy momentum tensor of massive hadrons	5
Single spin asymmetry in pA collisions: phenomenology at RHIC	5
Polarized targets for experiments with high energy beams	5
Overview of the sPHENIX cold-QCD program	5
Overview of future facilities for nucleon spin studies	5
Discussion session	5
Discussion session	5
Discussion session	6
Discussion session	6
Closing address	6
Announcements	6
Announcements	6
Announcements	6
Flavor asymmetry of quarks and antiquarks in the nucleon sea	6
Flavor asymmetry of quarks and antiquarks in the nucleon sea	6
Polarized parton distribution functions from lattice QCD (slides only)	7

Tuesday Morning / 13

Opening Address

Corresponding Author: shibata.toshiaki01@gmail.com

Tuesday Morning / 15

Experimental results and future plans at STAR

Tuesday Morning / 16

Experimental studies of proton spin at PHENIX

Tuesday Morning / 17

Recent theory developments in QCD spin

Tuesday Morning / 18

Longitudinal double-spin asymmetries in SIDIS studied at HERMES

Corresponding Author: miyachi@sci.kj.yamagata-u.ac.jp

Tuesday Morning / 19

The COMPASS program with the muon beam: past, present and future

Tuesday Afternoon / 20

Proton spin from quark and gluon

Tuesday Afternoon / 21

Strange quark suppression from a simultaneous MC analysis of parton distribution and fragmentation functions (file only)

due to not being able to attend, only the file is uploaded at this location

Tuesday Afternoon / 22

”Non-pole” approach to the Sivers effect in the collinear twist-3 formalism

Corresponding Author: yoshida@nt.sc.niigata-u.ac.jp

Tuesday Afternoon / 23

Revealing the nucleon’s spin structure using inclusive electron scattering at Jefferson Lab

Tuesday Afternoon / 24

Proton structure measurements at LHC

Tuesday Afternoon / 25

Spin-related effect in hadron production at BESIII

Wednesday Morning / 26

Two-photon physics at Belle

Wednesday Morning / 27

Fragmentation function related measurements at Belle

Corresponding Author: rseidl@riken.jp

Wednesday Morning / 28

Baryon timelike form factors

Wednesday Morning / 29

Mechanisms for transverse single-spin asymmetries

Wednesday Morning / 30

Latest results in the extraction of the Sivers and transversity distributions

Wednesday Morning / 31

Accessing GPDs with the exclusive pion-induced Drell-Yan process at J-PARC

Corresponding Author: kazuhiro.tanaka@kek.jp

Thursday Morning / 32

Pion-induced Drell-Yan experiments with transversely polarized proton target in COMPASS at CERN

Corresponding Author: genki@quark.kj.yamagata-u.ac.jp

Thursday Morning / 33

Measurement of polarized Drell-Yan process at FNAL E1039/SpinQuest

Corresponding Author: knakano@nucl.phys.titech.ac.jp

Thursday Morning / 34

Hadron physics and exclusive Drell-Yan process at J-PARC

Thursday Morning / 35

Proton radius

Corresponding Author: toshimi.suda@riken.jp

Thursday Morning / 36

Measurement of the neutron electric-to-magnetic form factor ratio at high momentum transfer

Thursday Afternoon / 37

Nucleon virtual Compton amplitude in lattice QCD

Thursday Afternoon / 38

Gluon transversity distribution in proton-deuteron collisions

Thursday Afternoon / 39

Studies of the nucleon 3-D structure with CLAS12 at Jefferson Lab

Thursday Afternoon / 40

Very forward particle productions at LHCf and RHICf

Thursday Afternoon / 41

First result of transverse single spin asymmetry for very forward π^0 production in polarized p+p collisions at $\sqrt{s} = 510$ GeV

Corresponding Author: jipangie@korea.ac.kr

Friday Morning / 42

Gravitational form factors for finding mass and pressure distributions in hadrons

Corresponding Author: shunzo.kumano@kek.jp

Friday Morning / 43

The energy momentum tensor of massive hadrons

Friday Morning / 44

Single spin asymmetry in pA collisions: phenomenology at RHIC

Friday Morning / 45

Polarized targets for experiments with high energy beams

Friday Morning / 46

Overview of the sPHENIX cold-QCD program

Friday Morning / 47

Overview of future facilities for nucleon spin studies

Corresponding Author: goto@bnl.gov

Tuesday Afternoon / 48

Discussion session

Wednesday Morning / 49

Discussion session

Thursday Afternoon / 50

Discussion session

Friday Morning / 51

Discussion session

Friday Morning / 52

Closing address

53

Announcements

Tuesday Morning / 54

Announcements
