Type: Plenary Presentation (by invitation only)

Theoretical studies on the 3D structure of the nucleon

Wednesday, 20 October 2021 19:15 (30 minutes)

I will discuss recent progress in the theoretical investigation of the partonic structure of the nucleon in terms of generalized parton distributions and transverse momentum dependent parton distributions. In particular, I will highlight the information encoded in these functions on the spin and multidimensional partonic structure of the nucleon.
