

The 24th International Spin Symposium

Contribution ID: 183

Type: **Plenary Presentation (by invitation only)**

Theoretical studies on the nucleon helicity structure

Thursday, 21 October 2021 11:00 (30 minutes)

In this talk we will provide an overview of the current theoretical status of observables that provide access to helicity PDFs and summarize the opportunities and challenges at the future EIC.

Primary authors: COCUZZA, Christopher (Temple University); SATO, nobuo (odu)

Presenter: COCUZZA, Christopher (Temple University)

Session Classification: Plenary Presentations

Track Classification: Plenary sessions: Plenary presentations
