

The 24th International Spin Symposium

Thursday, October 21, 2021

Low energy spin physics with lepton, photon and hadron probes - Room 401 (7:00 AM - 8:30 AM)

-Conveners: Hideki Kohri; Atsushi Tamii

time	[id] title	presenter
7:00 AM	[192] Search for the H-dibaryon near $\Lambda\Lambda$ and Ξp thresholds via $^{12}\text{C}(K^-, K^+)$ reactions at J-PARC	Dr KIM, Shin Hyung
7:30 AM	[191] Differential cross sections and photon beam asymmetries of eta photoproduction on the proton in the LEPS2/BGOegg experiment	HASHIMOTO, Toshikazu
7:50 AM	[152] Spin effects in low-energy electron-nucleon scattering with two-photon exchange: Analysis based on $1/N_c$ expansion of QCD	WILLEMYNS, Cintia
8:10 AM	[53] Coherent neutral-pion and eta-meson photoproduction on the deuteron	ISHIKAWA, Takatsugu
