

Session Program

29 April 2026 to 2 May 2026

QCS2026

Session 4

JAEA Tokai Mirai Base
7-25, Funaishikawa Eki Higashi 3, Tokai, Ibaraki, Japan

Thursday 30 April

13:10

Session 4

Session | Convener: Philipp Gubler

13:10-13:45

Self-bound hybrid stars with strong phase transitions can relieve major compact star observation tensions ----(online)----

Speaker

Chen Zhang

13:45-14:20

Understanding of Equations of States from Nuclear Transport Simulations.

Speaker

Myungkuk Kim

14:20

14:50

Session 4

Session | Convener: Philipp Gubler

14:50-15:25

Experimental plans in proton-nucleus and nucleus-nucleus collisions at J-PARC

Speaker

Hiroyuki Sako

15:25-16:00

Status and Commissioning Results of the J-PARC E16 experiment

Speaker

Satomi Nakasuga

16:00-16:20

Splitting of Transverse and Longitudinal Spectral Functions of the ϕ Meson at Finite Temperature and Density

Speaker

Hidefumi Matsuda

16:20
